

Dear FCC (Federal Communications Commission): We listen to K-LOVE Radio seven days a week to wake up in the morning and while we are driving in the car. K-LOVE Radio has made more of a positive impact in the world than any other radio station in the history of radio. There are currently more listeners tuned in to K-LOVE Radio than any other station in the United States and around the world. K-LOVE has a positive message and a very large following with the power of the vote nationwide here in the U.S. Do not allow Low Power FM radio to affect FM translators or hamper transmission of K-LOVE signals in any way. Any attempt to sensor K-LOVE Radio in any way will be considered a total disregard for decent radio programming by the FCC and will not be tolerated in the least form.

Sincerely, Ron and Jean Aragon, Merced, CA 95340
